

CANON PIXMA WIRELESS PRINTERS OFFER ROBUST WIRELESS CONNECTIVITY

Phnom Penh, 28 August 2014 – Canon, a leader in digital imaging solutions, has announced three PIXMA Wireless Inkjet Photo All-In-One printers and one single function mobile printer. The flagship PIXMA MG7570 is joined by the stylish yet affordable MG6670 and MG5670. The PIXMA iP110 wireless mobile printer completes the lineup.

Functionality in Style

The PIXMA MG7570 and MG6670 come in three attractive colors: black, white and orange, while the MG5670 is available in black and white. The choice of colors allows integration of the printers seamlessly into any modern home environment.

The iP110 delivers excellent print quality while maintaining portability and mobility. The slim and compact design makes it easy to slip the printer into any travelling bag. An optional rechargeable battery kit allows users to print while on the move and not worry about carrying bulky AC adaptors or power cables.

Wireless Print and Scan

The built-in Wi-Fi connectivity^{*1} and Access Point Mode feature for these printers stretch print and scan possibilities beyond those of conventional printers.

Apple AirPrint compatibility allows users of Apple mobile devices to print photos and documents in a local network environment without the need to install any vendor-dependent mobile applications. These printers are also the first in Canon's lineup to feature compatibility

i-Click Marketing Co., Ltd.

to the Mopria standard². Printers that are compliant to the Mopria standard allow photo and document printing from Android devices within a local wireless network, similar to Apple AirPrint technology.

For users to print documents or photos from mobile phones, tablets or wireless digital cameras, the Access Point Mode function allows direct wireless connection without the need for a wireless router.

PIXMA Printing Solutions App

The PIXMA Printing Solutions (PPS) mobile application for the iOS and Android OS platforms provides users with a one-stop solution for printing and scanning from mobile devices.

Mobile printing and scanning is made even easier with support for NFC (Near Field Communication). The MG7570 and MG6670 support this new PIXMA Touch & Print feature, allowing users to print, or scan by just tapping the mobile device on the printer's NFC sensor zone.

The PPS app also allows users to perform a range of printer setup and settings from the mobile device.

The Cableless Setup feature allows printer setup in a secured wireless environment, entirely from the mobile interface, and users can even check for remaining ink levels, which ink cartridges are compatible with their printer, and even maintenance operations such as printhead alignment and cleaning.

The app also enables access to the cloud printing service, PIXMA Cloud Link and Easy-PhotoPrint+.

Easy PhotoPrint+

Canon's new Easy PhotoPrint+⁴ is a new web application that offers photo layout and editing functions for tablet devices. Along with a wide range of templates like collages, calendars, and cards to choose from, users can also import images stored on the device, or from online platforms such as Photobucket and Facebook. With a further assortment of filters, stamps and text boxes to choose from, Easy-PhotoPrint+ unleashes more creativity possibilities with these PIXMA printers.

PIXMA Cloud Link

PIXMA Cloud Link compatibility allows users to access and print images or documents from popular online services such as Facebook, Flickr, Dropbox, and Creative Park Premium.

The latest upgrade to the PIXMA Cloud Link service now makes it possible to scan photos and documents into cloud storage services such as OneDrive and Google Drive. Users can even send scans straight to any email address with the Scan to Email feature, or attach scans to email drafts with the Scan to Webmail feature, so that they can edit those drafts at a later time.

PIXMA MG7570

Flagship All-In-One Wireless Printer with Advanced Cloud Printing Functions

Dimensions (WxDxH): 435 x 370 x 148mm (approx.)

Print Resolution: 9600 x 2400dpi (max.), 1pl ink droplets

Photo Print Speed: 21 secs (borderless 4 x 6")

Print Speed: 10.0 ipm (color) / 15.0 ipm (B&W)

Copy Speed: 7.7 ipm (color)

Duplex Printing: Automatic

i-Click Marketing Co., Ltd.

Caring for the Environment

Canon products are manufactured to the highest environmental standards that include Energy Star certification for energy efficiency and compliance with the EU's RoHS for hazardous materials. Recycled plastic is used extensively and printers launched this year will conserve even more packaging materials with a streamlined packaging relative to last year's models. In daily use, the Quick Start feature conserves electricity, while Auto Duplex printing and the ability to condense multiple pages on a single sheet reduce paper use significantly. At every stage from factory to home or office, Canon's photo printers are designed to have minimal impact on the environment.

About Canon Singapore Pte Ltd

Canon is a global leader in photographic and digital imaging solutions. Canon Singapore Pte Ltd is the headquarters for South & Southeast Asia driving sales, marketing and service strategies. Besides handling the domestic market, the company leads 18 other countries including subsidiaries in India, Malaysia, Thailand and Vietnam.
